

Please don't make it so that Airl is off the air! Airl helps me be positive all day long. I drive a lot during to week and I can always count on Airl to be there during my drive. I believe that if Airl were to be displaced by an LPFM broadcaster providing other programming in my community there would be more unhappy, intolerant drivers and thus there would be angrier people during the day and poor performance of people in their work and home. I believe that the service provided by Airl is in the public interest because they are examples of selflessness to the community. The radio station and the DJs give so much and are such a positive influences on all their listeners that it would be very sad for the station to be taken off the air.
